4. **Multiple profiles for multiple resume**
   - One User can have multiple profiles for and can create multiple resumes respectively.

Limitations and Future Improvements:

Limitations:
1. Currently in my app, the generated resume is based on only one template, which I provided.
2. The users can only view the resumes after being generated
3. The users can only provide the information, which for which I have asked for.
4. The users cannot delete the resume that they have generated

Future Improvements:

1. I could include multiple templates to choose for the user, additionally I can provide the feature to make customize the templates
2. The users could be provided the feature to view the template with their data before generating
3. I could include the feature for the users for adding new sections and customizing it.
4. The users could delete the resume that they don't want later on.
5. I could integrate AI for suggestions and automations.

In conclusion, Resumecraft stands out as a powerful tool for creating professional, customized resumes with ease. While it offers significant value through its intuitive interface and dynamic features, there are opportunities for further enhancements, such as providing multiple templates, customizable sections, and AI-driven suggestions. As Resumecraft continues to evolve, it aims to bridge the gap between standard resume builders and the personalized needs of job seekers, ultimately empowering users to present their strengths effectively in the competitive job market. The future of Resumecraft promises a more comprehensive, user-centric approach to resume creation, making it an invaluable resource for career advancement.
